

sinclair stations are abusing their right to use the public airwaves, which by law , must serve the public interest. In airing a biased story against Kerry and camouflaging it as 'news' they should have their license revoked. Unfortunately, they are a prime example of how our airwaves asre being usurped by corporations for their own political and financial interests thus leaving the public good and our democracy in the dust. Please add this note to the public comment. Florence Klein
